Precision Content Alignment AutomationSM

The world's most comprehensive standards alignment, visualization, and management system

With millions of education and CTE standards at your fingertips, ExACT helps to ensure adoption of content, increase discoverability, identify new markets, and target learning needs. ExACT is leveraged by our subject matter expert (SME) team and is also available for client facing applications. The three main components of the ExACT Alignment System are:

Standards

Access to Education and CTE Standards is at the Heart of the ExACT Platform

Armed with the world's most comprehensive Standards Repository, **ExACT** users have access to millions of up-to-date U.S., international, and supplemental education standards in a machine-readable format that can be added to their **ExACT** profile. Once added, alignments and reporting can begin.

Alignment Engine

Replacing spreadsheets and manual processes, ExACT leverages the power of the patented EdGate taxonomy to accurately align content to standards

- Globally align resources to standards for states, districts, provinces, territories, or unique supplemental standards
- Automatically capture standards updates and ensure alignments
- Store content metadata in one convenient place
- Integrate **ExACT** alignments into preferred system, for unlimited use

Reporting

Whether your in-house team is doing DIY alignments in the ExACT Platform or relying on EdGate's team of subject matter experts, our robust reporting system can:

- Easily perform searches and visualization of alignment data, allowing you to get rid of messy spreadsheets
- Provide instant visibility into data. Create on-demand reports for sales or marketing presentations, RFPs, state adoptions, or custom requirements
- Save time and money – no more waiting for alignments updates to run reports and export data
- Instantly provide visualization of cross-walks

The ExACT Alignment Tool allows us to mass align all of our content so that we are always up to date with the latest standards for our customers.

Is Nearpod aligned to the new standards?

This is the number one questions asked by potential and current clients.

Alex Bramer, Curriculum Alignment Specialist, Nearpod

ExACT is relied on by organizations like:

Precision Add-On Tools

Gap Analysis

At-a-Glance, simple to run analysis at the click of a button.

Gap Analysis helps reveal the educational standards that do not align to a specific content unit. This information can then be used for content development, state or district bids, and general analysis of content coverage for a specific standard. You will have the ability to:

- **View, print, or export reports** on aligned and non-aligned standards
- **Refine alignments**
- **Produce statistical reports** that reveal content coverage

Related Standards

The Related Standards feature is used to:

- **Broaden your alignments coverage.** If your current standards alignments are tight and you need to achieve more coverage for an RFP or adoption.
- **Easily align your content to all 50 states.** When you directly align a piece of content to a specific standard using EdGate's Direct Align tool, you can simultaneously direct align the resource to the same "standards" in other states.
- **Expand out from the Common Core.** Similar to the above, when you align your content to the Common Core standards, you can easily find related standards in additional states.
- **Repurpose your content.** Find alignments to similar, but different standards.

DirectAlign

Made for assessment items, Direct Align is designed to allow the alignment of content to one specific standards for each grade, state, or subject. Your team will be able to create 1:1 refinements, and improve alignment results by retaining the most fitting standards correlations to reinforce student learning.

AutoAlign

For high volumes of educational resources, there's **ExACT AutoAlign**. This tool analyzes metadata and associates resources with appropriate educational concepts and educational standards.

Save your organization time and money

ExACT can align a complete curriculum to all 50 states in a fraction of the time it would take using the traditional state-by-state method that many companies use.

What sets ExACT apart? It's a combination of things

The framework upon which **ExACT** was developed is EdGate's Concept Index. A Taxonomical list of educational concepts designed and built based on K-12 and CTE standards. Incorporating six (6) U.S. Patents, the taxonomy is continually being updated and improved to provide the most precise results possible.

Combine with advanced technologies like AI and highly skilled team of subject matter experts, **ExACT** is the only alignment solution available that is available in both a DIY and full service model.
