

Curriculum Matrix: OER You Can Trust

Open Education Resources (OER) are not all created — or able to be searched — equally. EdGate, the world's leader in educational standards and alignment technologies, has built a robust OER library of high-quality materials that is easy to search so you can quickly find the right content for you.

A trusted industry leader for more than 25 years, EdGate understands the value of enhanced OER. We have identified, vetted, and sorted a vast array of educational resources, matched them to standards, and coded them to ensure you have the content needed to supplement your curriculum programs.

Top Quality OER Aligned to Global Standards

Curriculum Matrix from EdGate includes more than 100,000 curated OERs sorted by grade level. Our team of subject matter experts (SMEs) has aligned them to more than three million educational standards including:

- Common Core
- TEKS
- NCSS
- NGSS
- **All 50 state standards**
- Canadian, Australian, and other international standards
- Plus many more supplemental standards.

Searchable content in eight subject areas:

- Arts
- Health and PE
- Language Arts
- Mathematics
- Media Technology
- Science
- Social Studies
- World Languages

New content is added regularly

Myriad resource types, including:

- Courses
- Videos
- Lesson plans
- Games
- Homework assignments
- Worksheets
- Activities
- Printables, and more

Curriculum Matrix is designed to make it simple to search different academic concepts (such as fractions, photosynthesis, etc.)

Content is formatted in:

- Word
- HTML
- PDF
- Video
- Powerpoint

Resources are available in:

- English
- Spanish
- French
- Portuguese
- German

EdGate’s Curriculum Matrix proprietary technology makes searching content fast and easy. Speedy search-ability isn’t its only benefit. All the content is verified, tested, aligned to standards, and vetted by professional educators.

Expert Content Curation

EdGate is committed to OER content leadership, with new material added all the time. Our clients can rest assured knowing the content in Curriculum Matrix has been vetted for quality by EdGate’s in-house SMEs. The team includes former educators and librarians with hundreds of years of combined educational experience, all dedicated to providing world-class service and resources trusted by industry leaders.

Resource Curation Strategy

- EdGate’s experts select content for Curriculum Matrix by:
- Deciding whether they would use it in their classrooms
 - Determining how it contributes to a specific learning outcome
 - Ensuring resources come from respected, well-known organizations
 - Checking that materials are evergreen, so they don’t become dated
 - Making certain all content includes terms of use from the original source
 - Ensuring no – or minimal – advertising is allowed
 - Exploring options for content variety including lessons, videos, activities, labs, assessments, games, and more
 - Checking that materials are appropriate for the targeted learner, including whether it’s challenging, on target, or has a skill-builder designation

Curriculum Matrix At-a-Glance

- More than 100,000 unique resources
- Millions of alignments
- Content from more than 100 reputable and trusted publishers
- Content libraries built to suit differentiated learning styles
- Simple to search and sort
- Easy to integrate into third-party applications
