

Data Delivery Options

Which delivery option is right for you?

ExACT Reporting Tool

The ExACT reporting tool allows authorized users to generate correlation reports in Word, Excel, PDF and HTML. ExACT provides the ability to query both the Standards and Content in the following report options:

Content Unit Report

This report displays the correlation data from the resource perspective. The resource is listed followed by all the associated standards.

This report displays the correlation data from the standards perspective. The standards are listed followed by all the associated resources. Access to this online tool is provided for your staff through password protected logins, and requires no involvement of client's technical team.

The Correlation User Interface (CUI) is EdGate's most popular deliverable for promoting your aligned instructional resources directly from your website. In addition to marketing your alignments, the CUI empowers users to dynamically search and retrieve the correlation data in real time. Hosted by EdGate, this iFrame is designed to be branded and embedded into your website to maintain the site's look and feel. Search options may include grade, subject, standards, products and key terms.

Requires minimal involvement of client's technical team to embed I-Frame search interface within the client's website.

Standards Search / Search Results

lew York State Learning Standards and Core Curriculum: Science - Grade 1 🛛 🔤 🗃

NY.1.1. Waves: Light and Sound

Students who demonstrate understanding can:

PS4-1.

Plan and conduct investigations to provide evidence that vibrating materials can make sound and that sound can make materials vibrate. **materials correlated to this standard** →

1-PS4-2.

Make observations (firsthand or from media) to construct an evidence-based account that objects can be seen only when illuminated.

materials correlated to this standard

1-PS4-3.

Plan and conduct an investigation to determine the effect of placing objects made with different materials in the path of a beam of light.

The EdGate Data Service API is a REST based API platform that allows clients direct, secure access to the EdGate data repository. The API is available to both our licensing and correlation clients. Using the API gives clients and their developers complete flexibility and control in creating tools to display standards and correlation data. Access to the API is secure and protected via public/private key based authentication. The API is divided into six separate resources, each representing a different type of data and housing endpoints specific to that type of data:

- Profile resource Access which data sets and options are available
- Standards resource Search, browse, and view curriculum standards
- Content resource Search, upload, edit and delete content metadata
- Correlations resource Find correlations between standards and content items
- Concepts resource Search, browse and view curricular concepts
- Insights resource Get insights into your data with suggested key terms, subjects and grades

Requires involvement of client's technical team to retrieve correlation data, create user interface, and populate search results.

Bulk Download (raw data feed) weekly delivery

The Bulk Download data files data files are provided in tab delimited format. Bulk downloads are available to both our licensing and correlation clients with data files delivered and accessible through a passwordprotected web interface. The files are easily ingested by the client's technical team and the data can be used to support correlation search results for a client created user interface.

Requires involvement of client's technical team to retrieve correlation data, create user interface, and populate search results.

Feature Matrix

| Feature | Exact Reporting | Correlation User Interface | Bulk Download | API |
|--|-----------------|-------------------------------|---------------|---------------|
| ExACT Reporting access included | Χ | Χ | Χ | Χ |
| One-time set-up fee required | | X | X | Χ |
| Requires annual maintenance fee | | X | Χ | Χ |
| Requires weekly pickup | | | Χ | |
| Allows for flexible UI on client side | | X | Χ | Χ |
| Development Required by Client | None | Minimal | Moderate/High | Moderate/High |
