

# Standards Authoring

## Standards Authoring Built for Real-World Standards Teams

The ExACT Standards Alignment Platform (ExACT) is a collection of digital tools for managing, reporting and aligning content to standards. Clients use ExACT to define gaps in alignments, crosswalk standards, search the EdGate Standards Repository, and create custom reports.

## Our Latest Addition: Authoring

Standards Authoring is the latest enhancement available in ExACT. Standards Authoring not only provides importing capabilities for existing standards and frameworks, but also gives authors the ability to manage and edit them.

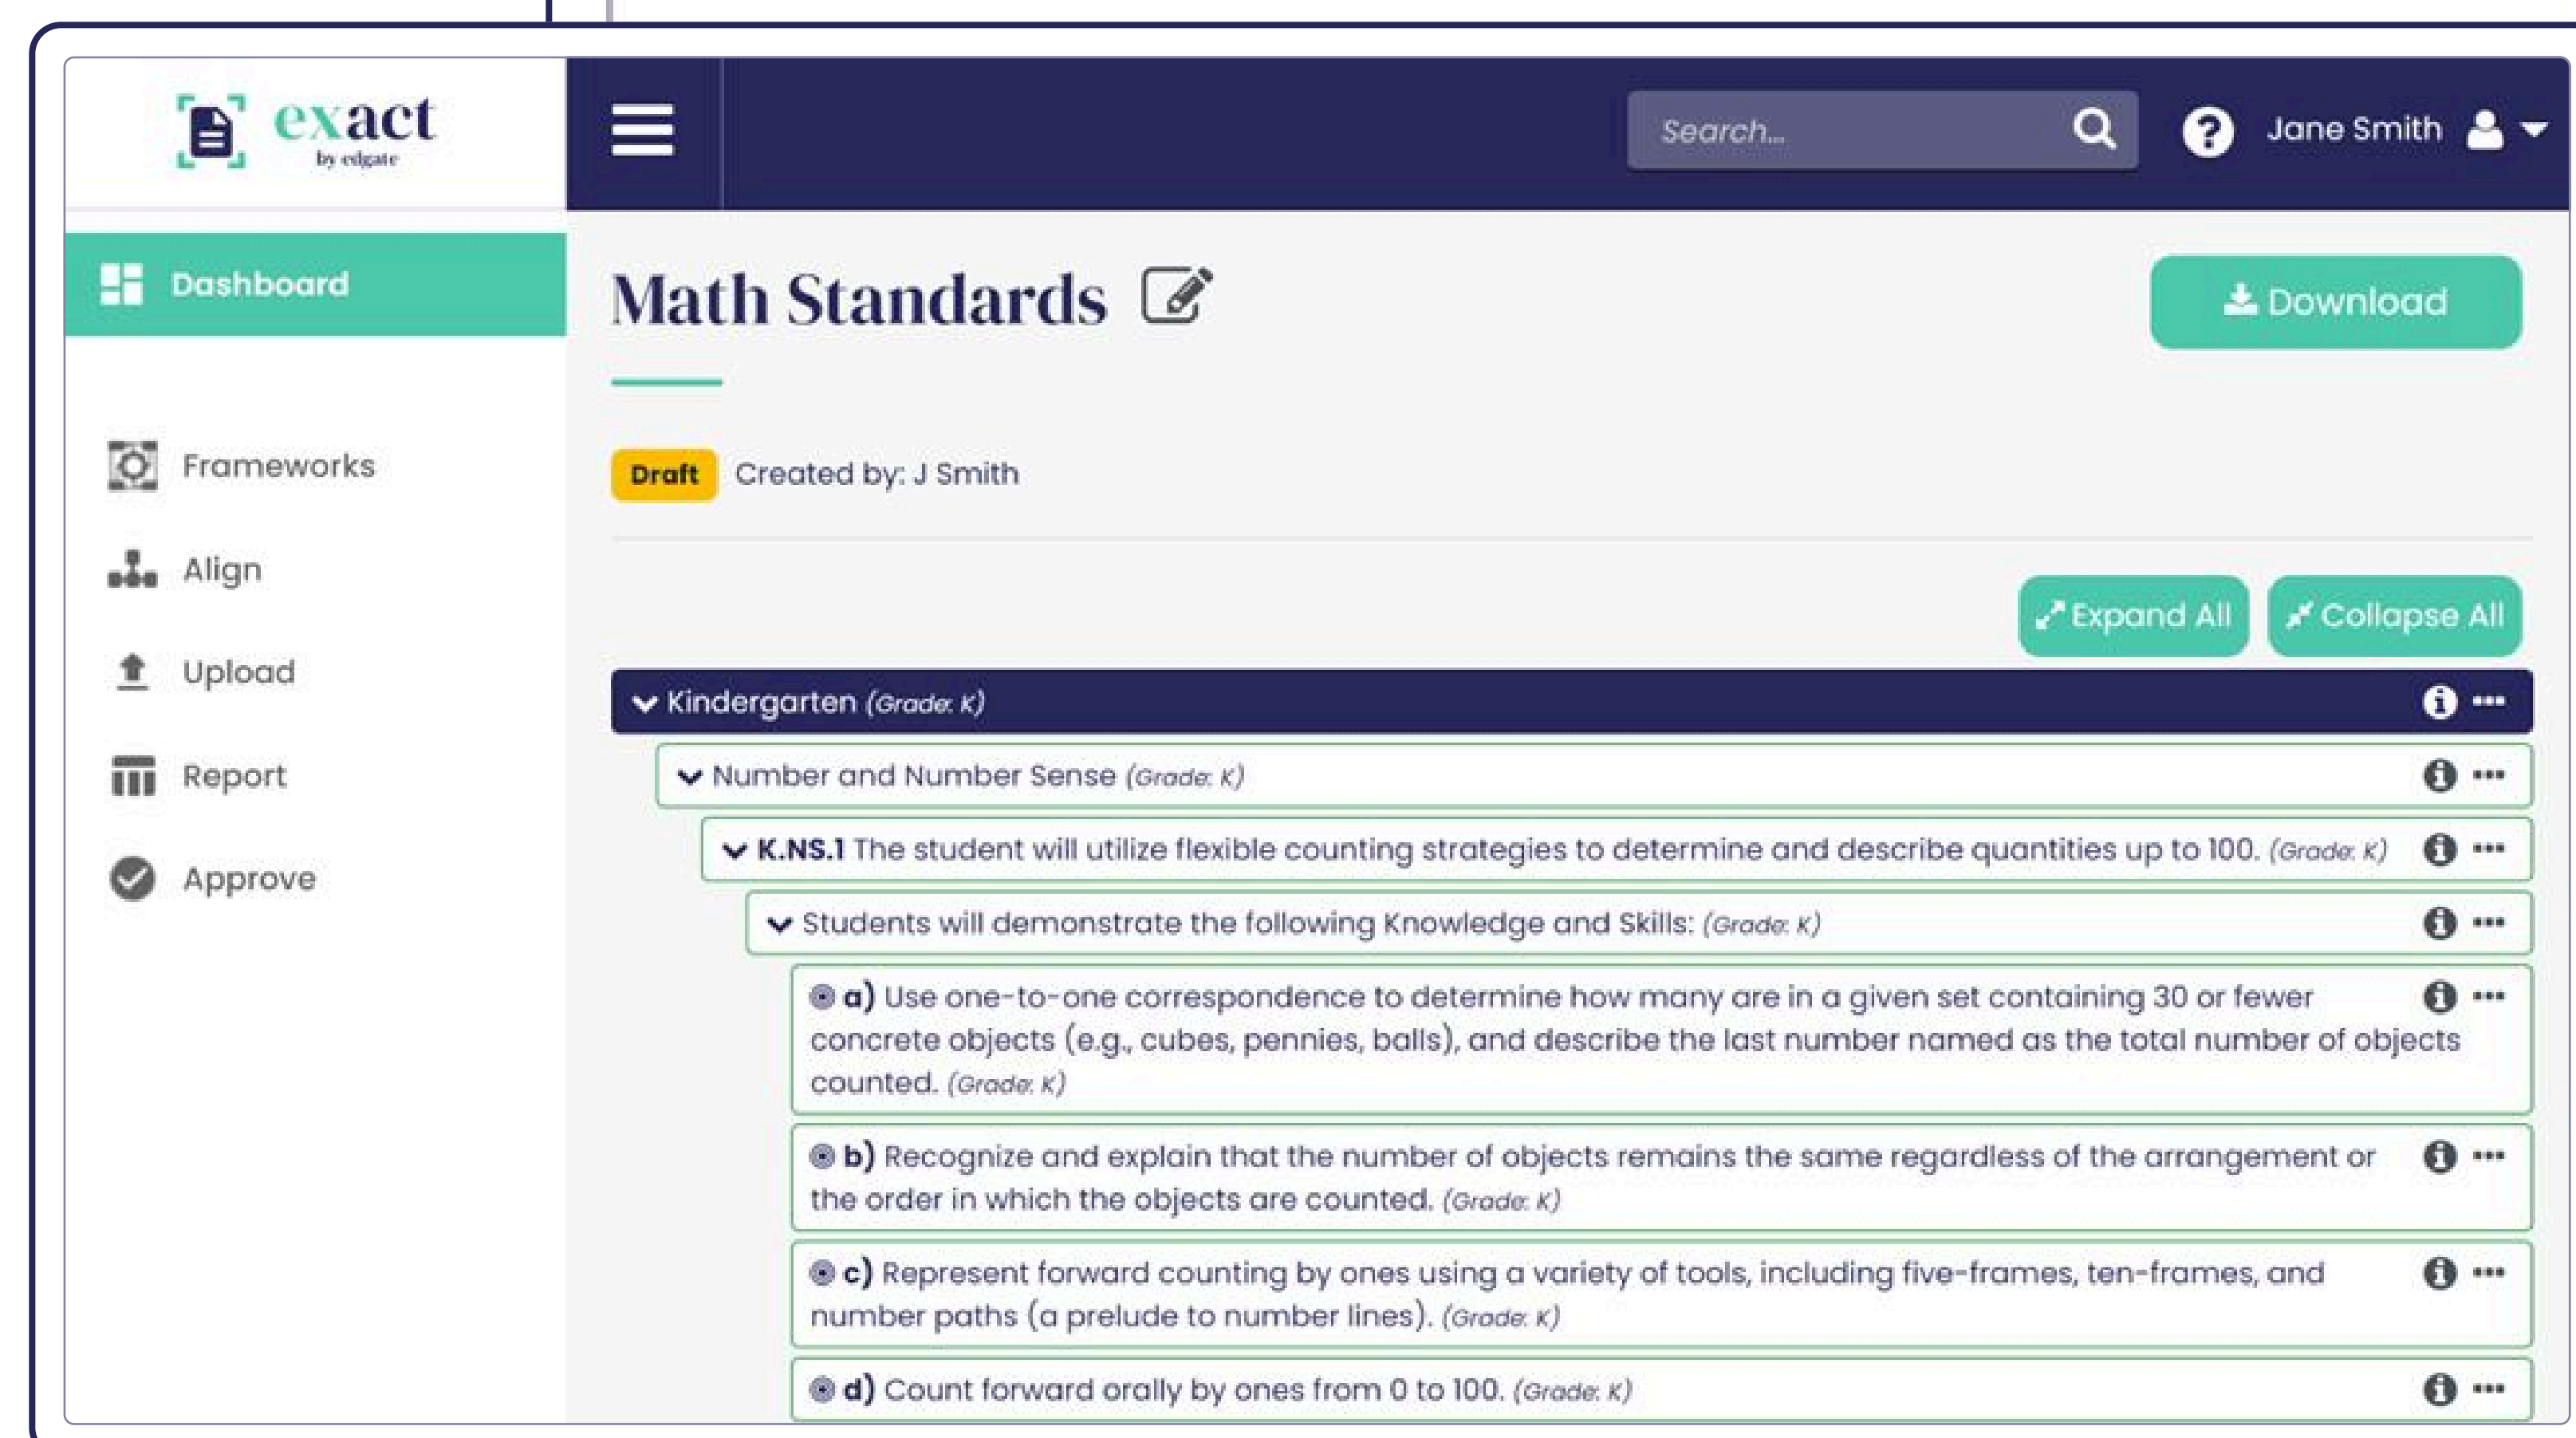

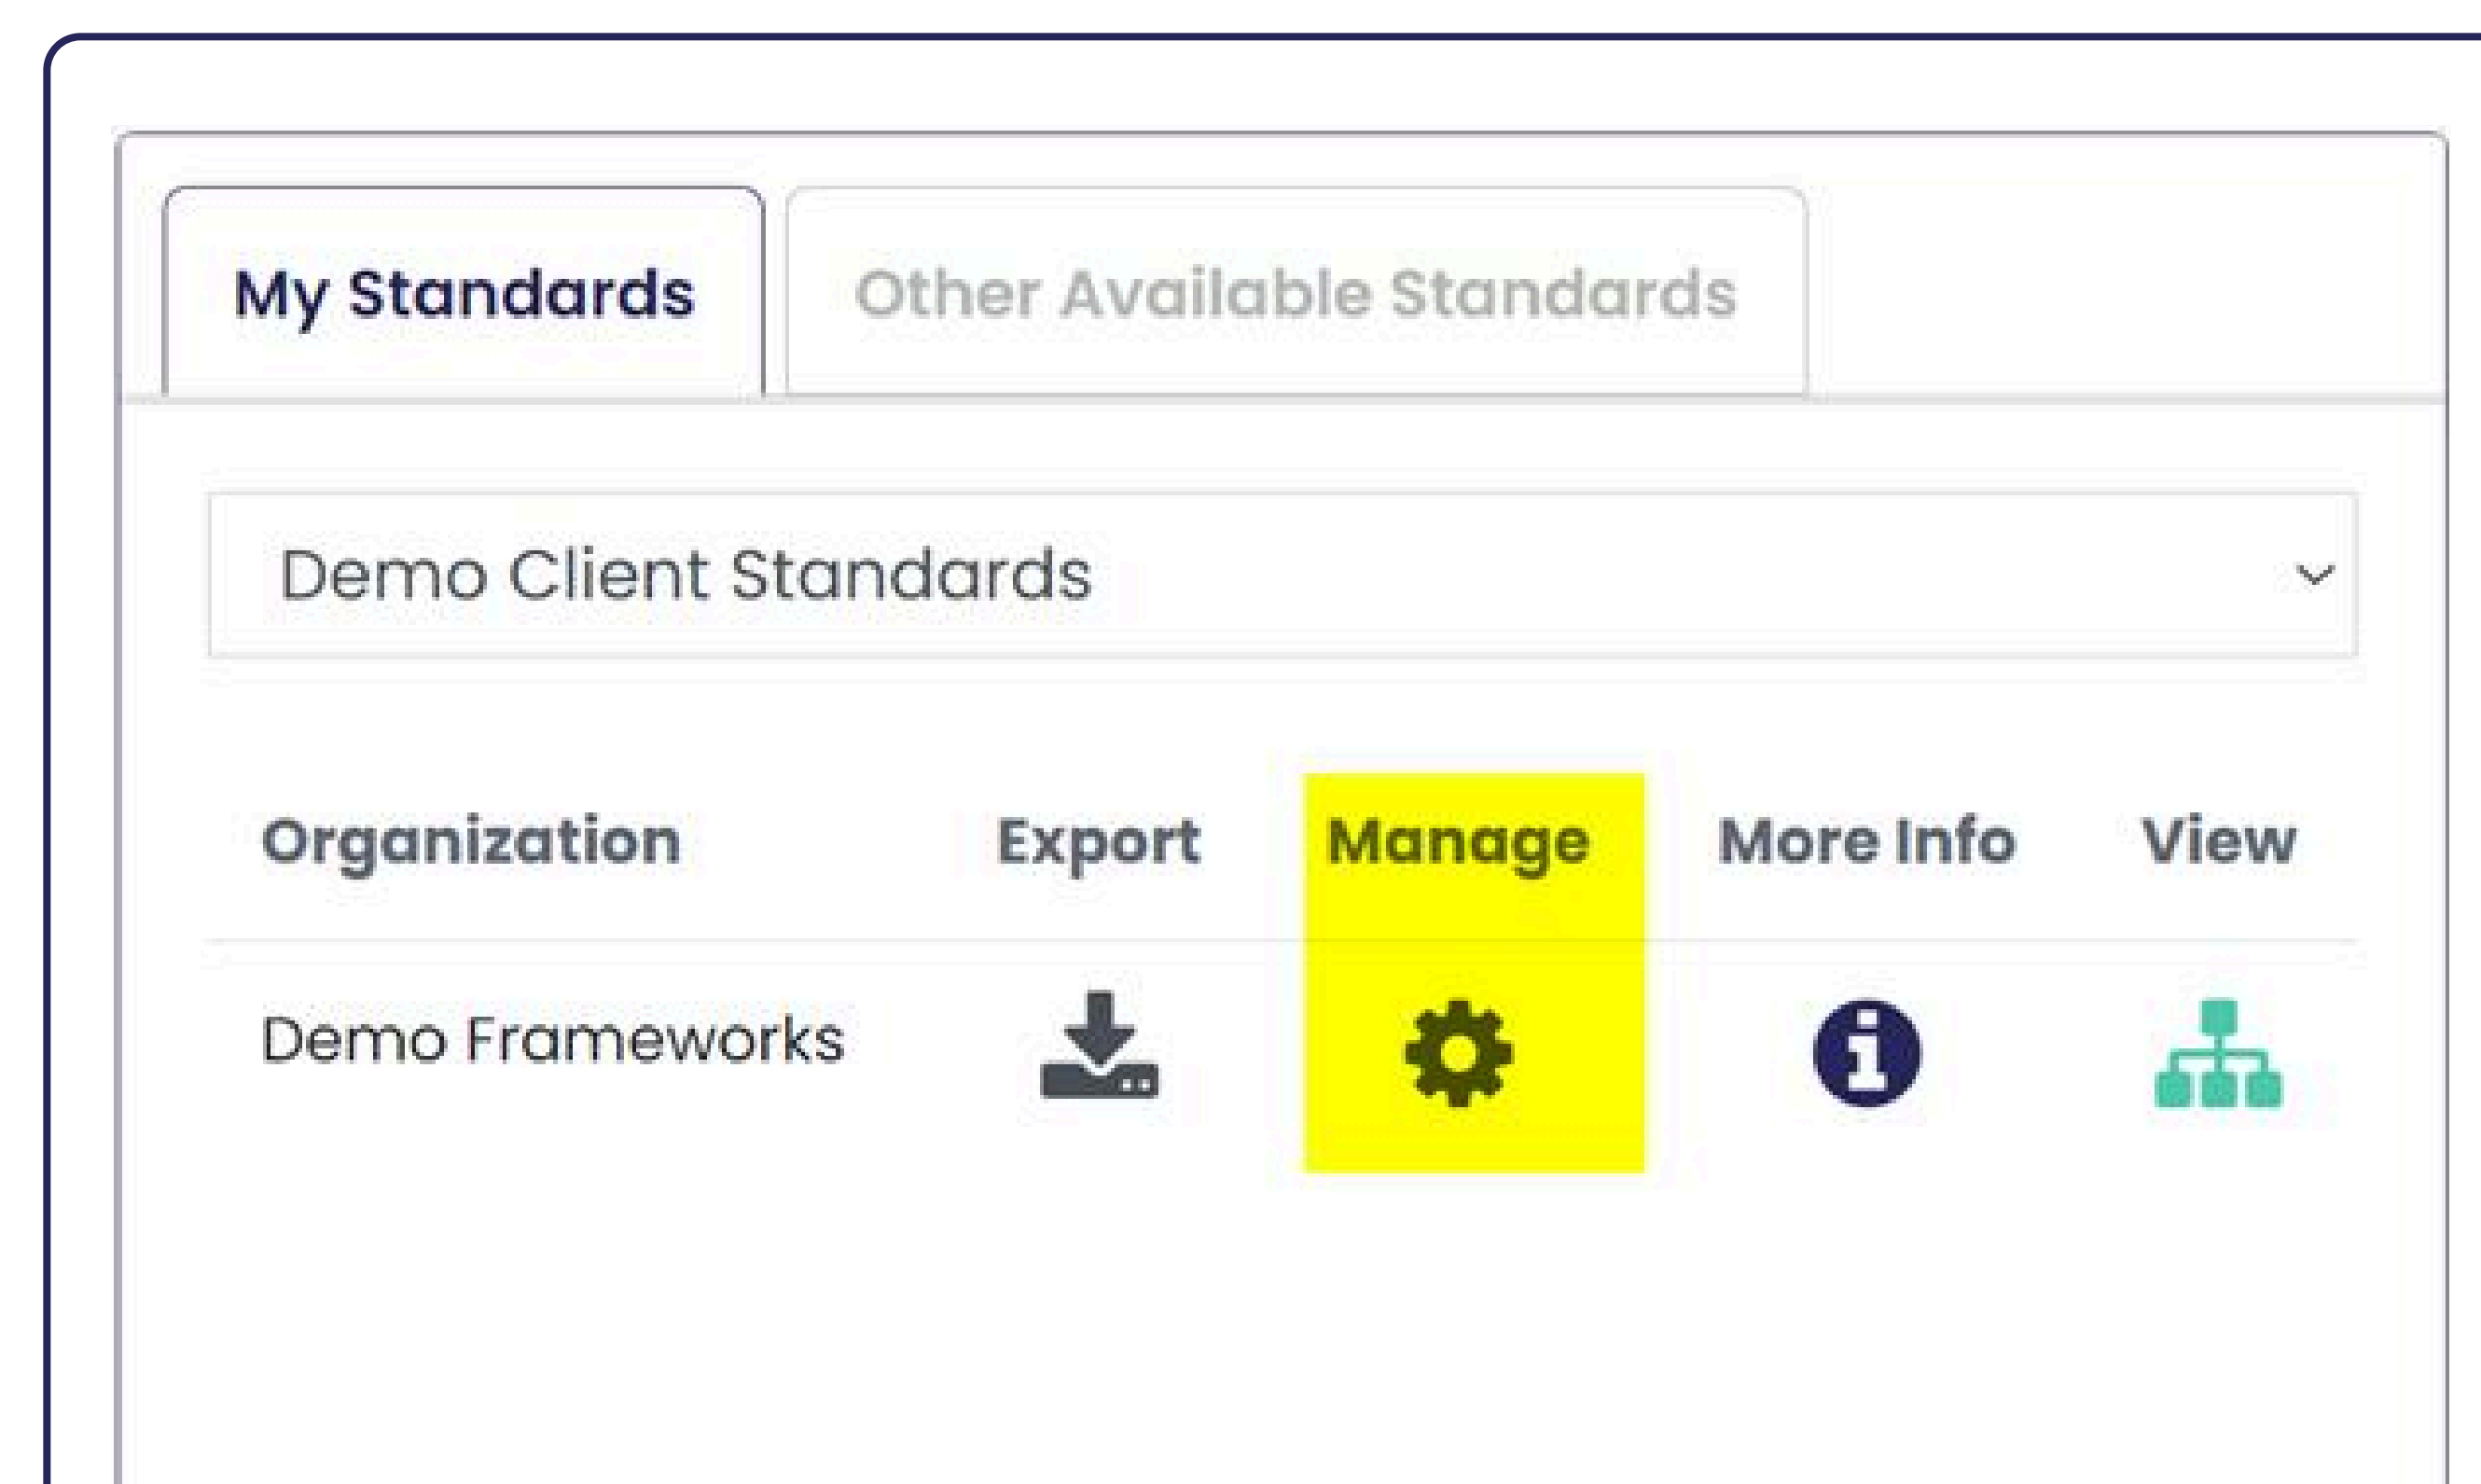

Customized for State Departments of Education, Publisher, and Non-Profit Organization needs, ExACT now also offers the option to create brand new standards and frameworks.

## Secure Authoring + Storage

With many organizations currently managing their standards in hundreds of Google spreadsheets, the ExACT Standards Authoring tool offers a centralized solution that safely organizes and stores standards as they are being written.

## Here's What You Can Accomplish with ExACT Standards Authoring:

- Design and Develop Content Standards:** Create and refine content standards across all K-12 subjects and adult learning.
- Import/Export Functionality:** Seamlessly import and export standards.
- Alignments:** Utilize the EdGate Concept Index to link relevant terms with the newly created standards. EdGate's alignment methodology allows users to view detailed content alignments and standards comparisons.
- Standards Comparison:** Generate reports comparing authored standards with other state and national standard sets.
- CASE Formatting:** Ensure standards are in 1EdTech CASE-format.
- Hosting:** Secure hosting of standards within EdGate's repository. This public facing UI is client branded for publishing the final copy of frameworks and standards for the public to view, download and comment on.

# Standards **Authoring**

## The EdGate Standards Repository

EdGate provides access to the world's largest repository of enhanced U.S. and international education standards. EdGate's expertise includes providing SAAS solutions in standards framework analytics and design through consulting services delivered by a strong team of subject area experts and within a secure environment for client content management.

### New and Powerful Features Available Now

- Rights Management:** Assign and manage rights, monitor modifications and approve edits throughout the workflow stages of design, draft and published standards
- Structured Review & Publishing Workflows:** Leverage robust authoring pipelines tailored to IEdTech CASE standards. Newly authored or imported frameworks can move through configurable review stages—drafting, review, approval, publishing—complete with version and permission controls.
- Learning Object Repository (LOR) Integration:** Built-in LOR support lets you host, manage, and link reusable resources—such as documents, videos, assessments—and tie them directly to your standards. Promote asset reuse and maintain alignment within and across curricula.
- Built-In Commenting:** Facilitate rich, context-sensitive conversations. Comment directly on standards, lines, or structure elements during the review cycle. Keep feedback threads archived and traceable for transparency and auditability.

Harness the power of the ExACT Standards Platform to streamline your standards management process. With Standards Authoring, EdGate empowers you to publish, manage, and create new standards effortlessly. Join the many educators and institutions who trust EdGate for their academic standards needs.

## Exciting New Standards Authoring Features on the Horizon:

Our team of developers are continuously working to bring additional features to ExACT that enhance the Standards Authoring Application. These new features will provide even greater control and flexibility, making it easier to manage and maintain educational standards. Stay tuned for these new powerful updates.
